# OFTEN INVISIBLE ALWAYS ESSENTIAL

## Freudenberg Sealing Technologies

Freudenberg Sealing Technologies is the largest division of the Freudenberg Group, a family business with more than 37,000 employees in 58 countries. The sealing business at Freudenberg was established with the development of the Simmerring® in 1929.

As a technology specialist and world leader in sealing technology, we offer our customers a constantly growing range of sealing solutions geared to the needs of different segments, applications and conditions. With innovative development methods and high-quality materials, we provide impetus for the safety of installations and the environment.

Freudenberg Sealing Technologies combines a sound and sophisticated technological know-how with dynamic innovation, materials knowledge, mastery of technology, applications experience and optimal process quality. Our goal is to provide customers with custom-tailored solutions and complementary sealing systems of the highest quality.

### THE SERVICE PACKAGE OF FREUDENBERG SEALING TECHNOLOGIES

- The largest product range worldwide
- Permanent innovation
- Unique materials expertise and high quality standards
- A multitude of integrated services
- Global competence with the knowledge of local market requirements
- Sound advice and support for a variety of solutions
- Exclusive services and engineering capabilities
- Product solutions and developments for a great variety of requirements
- Highly qualified and certified partners in the technical trade

# STRONG PARTNERS – CLOSER TO THE CUSTOMER

When it comes to the selection of our strategic partners, we are as uncompromising here as in respect of our sealing quality. Only a few highly qualified companies make up our global network of technical distributors. But these are partners whom we trust and build on – for decades and beyond national borders. They have the same high quality standards we have, are competent specialists and share our values. That is the only way we can combine premium quality and premium service for our customers.

## FREUDENBERG SEALING TECHNOLOGIES PREFERRED DISTRIBUTORS – MORE THAN JUST DEALERS:

- Access to the global Freudenberg Sealing Technologies product range
- Highest technical competence
- Qualified training and certified sealing know-how
- simple, fast and coordinated processes
- Reliable logistics and secure supply chain management
- Access to our engineering services and our materials expertise at any time

# SERVICE WITH ADDED VALUE

---

As an industry expert, Gottwald has extensive technical know-how at its disposal. This assures you, in addition to the excellent product performance, of application-specific consulting services whenever necessary.

## INNOVATIVE, ENVIRONMENTALLY COMPATIBLE FLUID SOLUTIONS

As part of the „Fluid Engineering“, the specialists at Franz Gottwald have developed and successfully implemented a comprehensive concept for systematic and preventive maintenance. Thanks to innovative methods for assessing hydraulic systems on site, it is possible to increase the productivity and to reduce the operating costs. In addition, an important environmentally friendly effect benefits the environmental protection activities of companies certified in accordance with DIN EN ISO 14001/2004. In Hamburg, the Gottwald Group also operates a center for hydraulic accumulator technology in collaboration with Integral, another Freudenberg company.

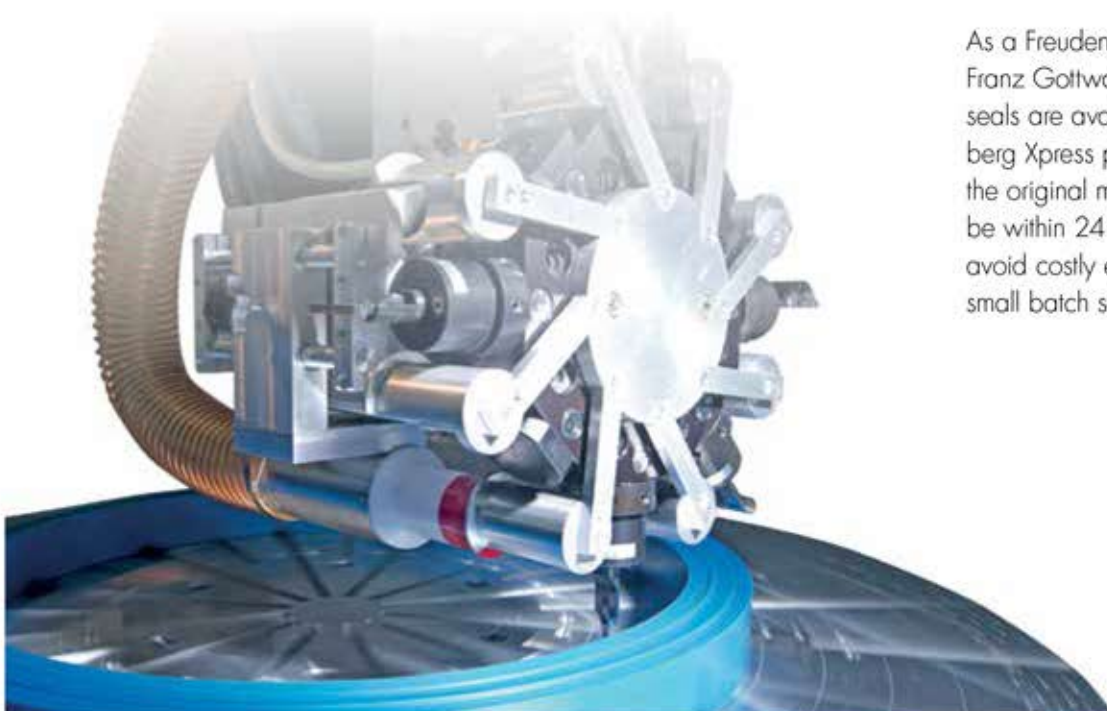

---

# FREUDENBERG XPRESS PARTNER

---

Rapid machined seals with the quality standards of series production

As a Freudenberg Xpress service partner, Franz Gottwald ensures that your needed seals are available in no time at all. Freudenberg Xpress provides custom-made seals in the original material quality – even if it must be within 24 hours. In this way, you can avoid costly equipment downtime or procure small batch series economically.
